

Corporate Presentation

2013

Our **Mission** is to transform
Interactive Telephony into
Open Communications
thru VoiceXML

IVR / IVVR

We are the creators of **Vxi*** the VoiceXML Browser for Asterisk
a powerful software to build your own IVR / IVVR server

Asterisk, is the leading Open Source Telephony Platform with millions of servers and thousands of developers

<VoiceXML>

Vxi* runs VoiceXML 2.0 and 2.1 Open Standard Applications to build advanced Business Telephony Services

360-degree Voice & Video Solutions for any Business

Softphones, Smartphones,
Tablets, IP Phones...

Flash / Web
Videocall

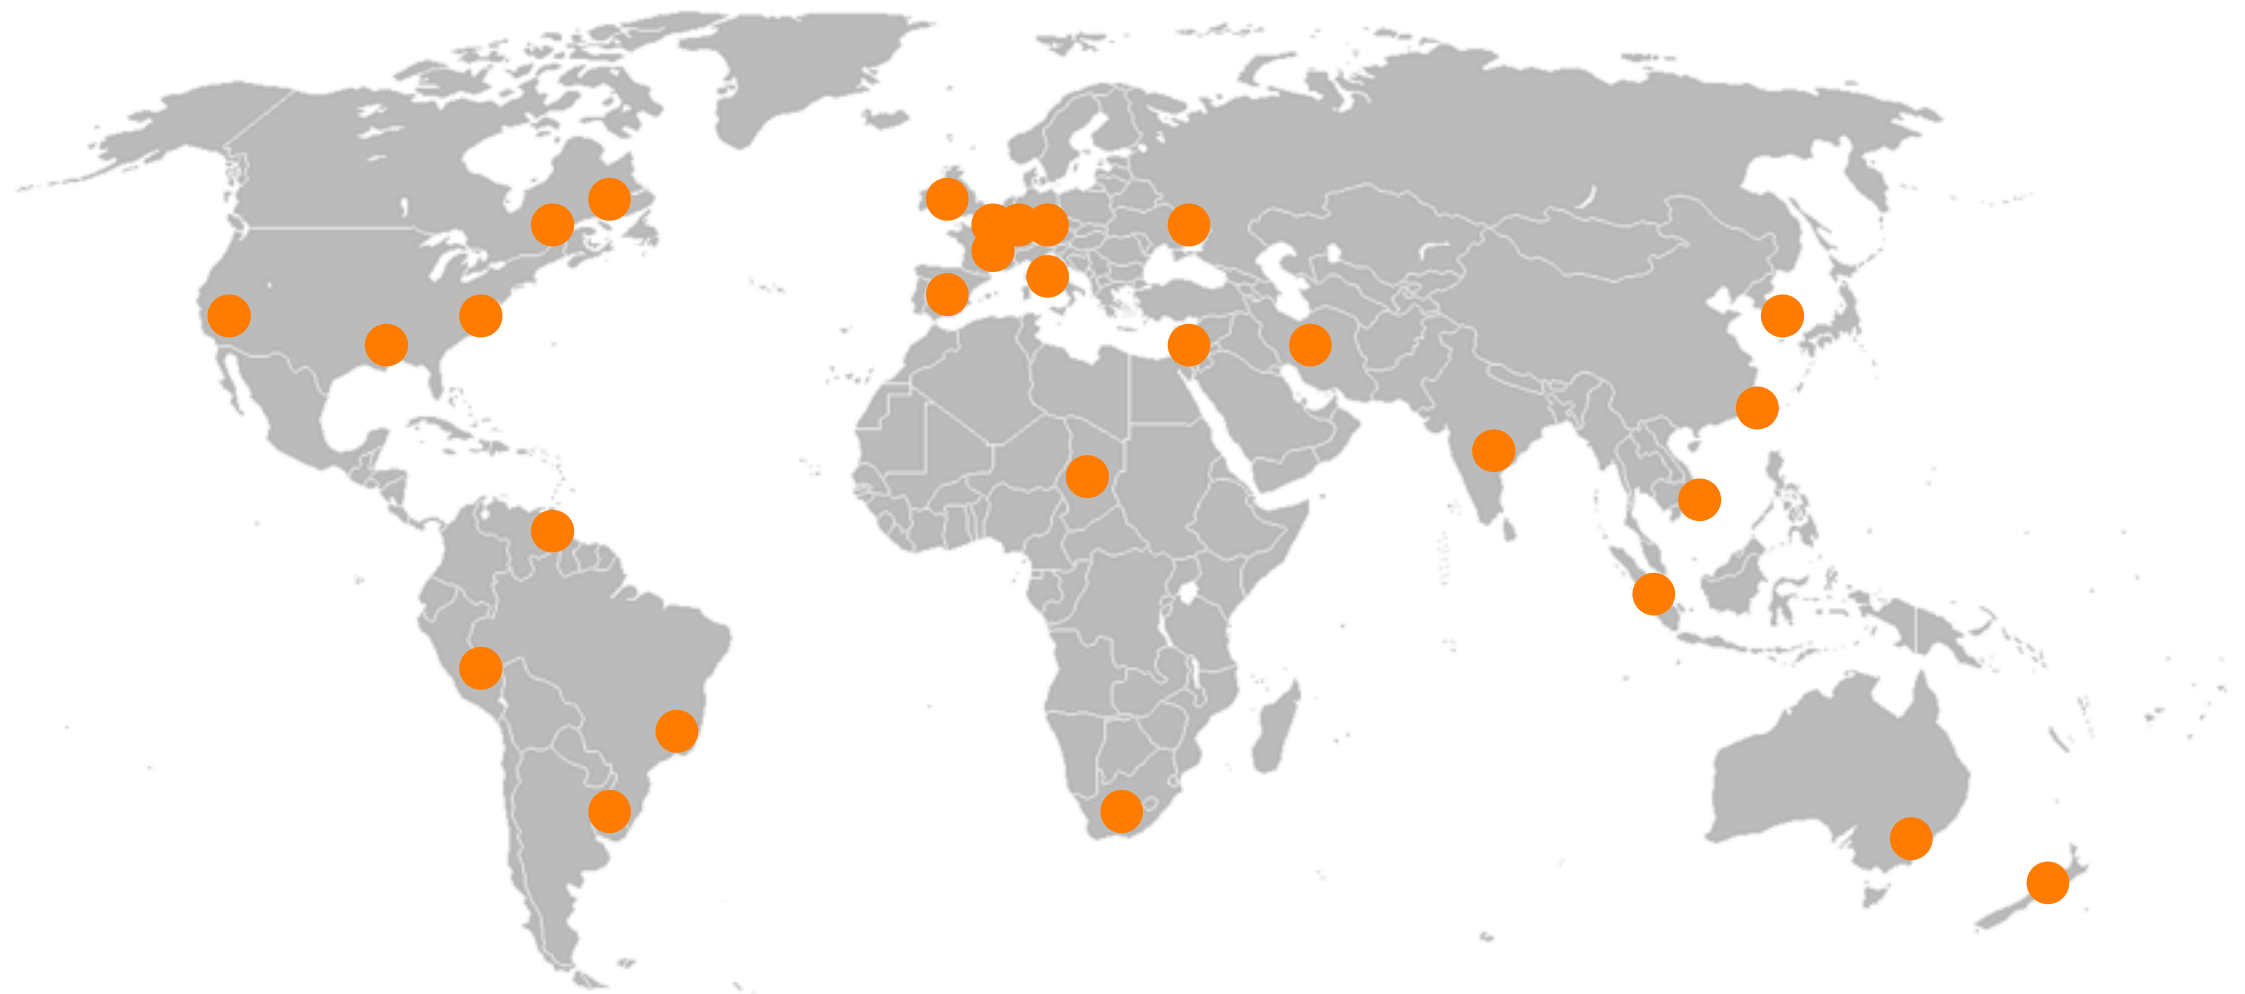

Our Management Team works everyday to provide you
the best and cost efficient IVR / IVVR technology
